How to make a hiphop beat on bandlab

- Open https://www.bandlab.com/feed/trending
- In the top right of your screen, click on the red create button

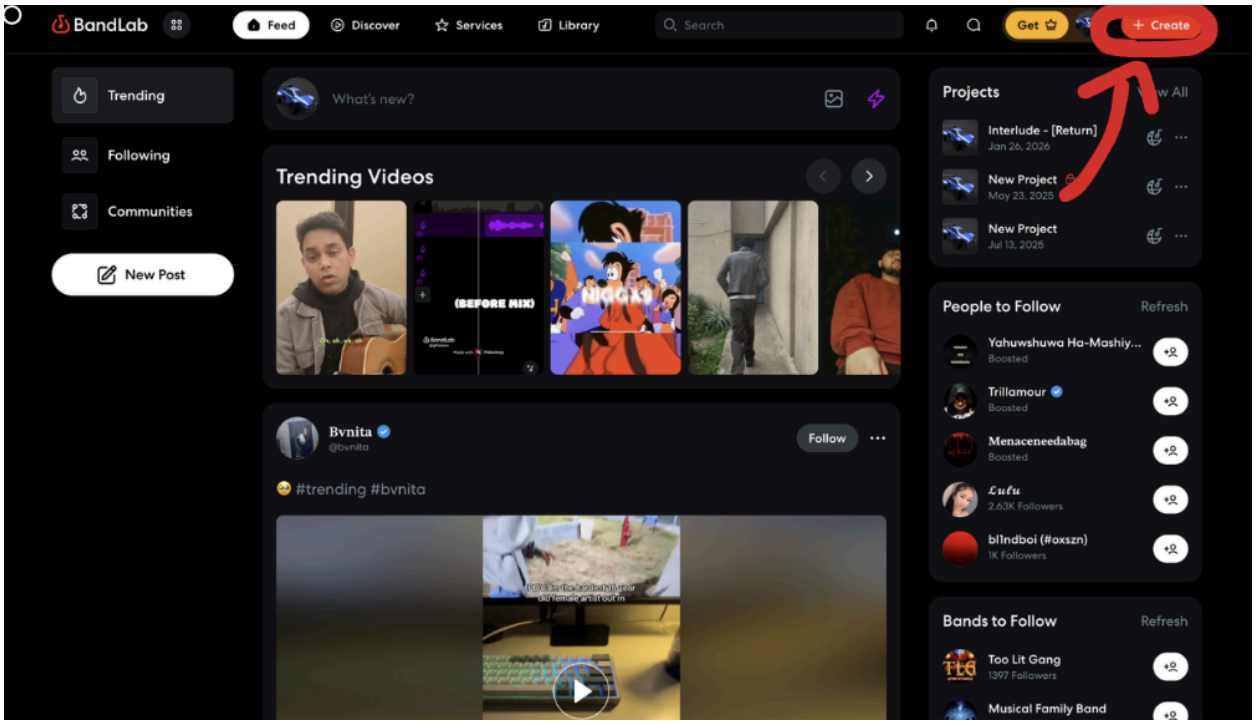

Figure 1: Image showing the create button, in which users can click and create their own bandlab beats or songs or both. Source: Abhi Badia

- In the dropdown, click on new project
- In the popup, click x in top right corner
- Visit https://www.looperman.com/

- On the top navigation bar, click on loops
- Click on Adv. Search

Figure 3: Image showing where the last two steps are. The red arrow is pointing to the loops button in the navigation bar, and the blue arrow is pointing to the adv. search button. Source: Abhi Badia

- Under the Keywords field, search for hiphop

- Go to the first result
- Click on Go To Download
- Note down the BPM of this loop (Lets use this image below as our test loop so we note down 160 BPM)

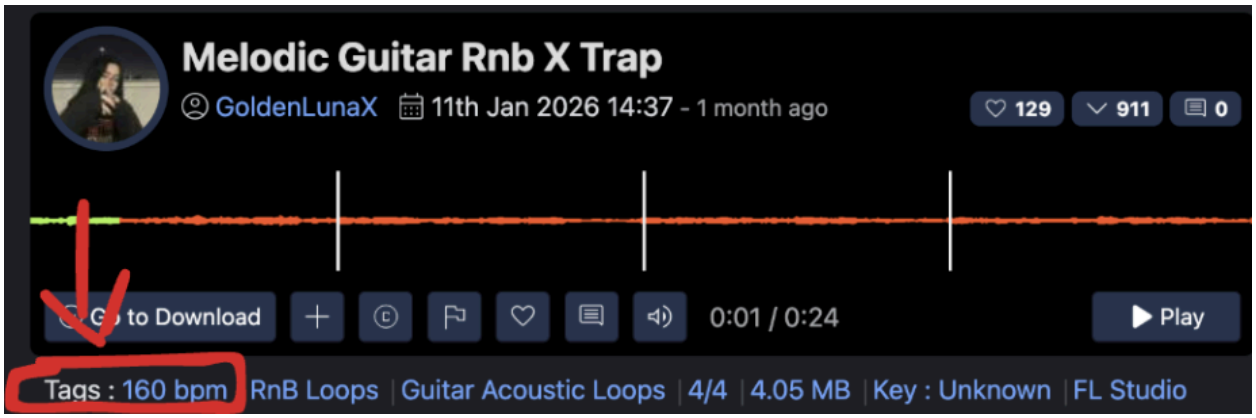

Figure 4: Image showing where the BPM count is. Source: Abhi Badia

- Go back to adv search
- Under the BPM fields, type in whatever 160 in both the "from" and "to" fields
- Clear hiphop as the keyword
- Type in drums
- Click search
- Download the first drum loop
- Go back to the bandlab
- Click on the drop loop button
- Upload the first loop you downloaded
- Under that, click drop loop button again
- Upload the second loop
